

For finding faults in
electrical circuits

Art.-Nr. 071214_1

DESCRIPTION:

- For use on 12 V vehicle electrical systems
- Easy, multi-purpose use
- Fuse strengths adjustable from 5A to 30A
- LED indicator lights
- Additional acoustic warning of tripped fuses
- Reset button for tripped fuses
- Tester needs no internal battery
- Connections for mini, midi and torpedo fuses

**No unnecessary consumption
of fuses during fault finding!**

OTHER ADVANTAGES:

- Continuous protection for the electrical circuit
- The current strength in attached components can be tested and determined afresh
- RESET button permits rapid resetting of a tripped fuse
