Radiator cap release tool for all current VW Group vehicles

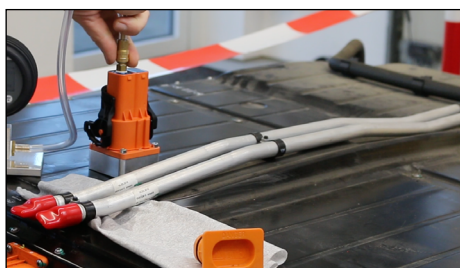

KDL 03

Can be used for VW, VW commercial vehicles, Audi, Skoda, Seat..., for petrol and diesel vehicles as well as for all hybrid and electric vehicles.

The perfect combination for leak detection on hybrid and electric vehicles!

LTBG 04 und ELS 04

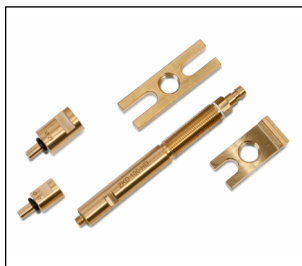

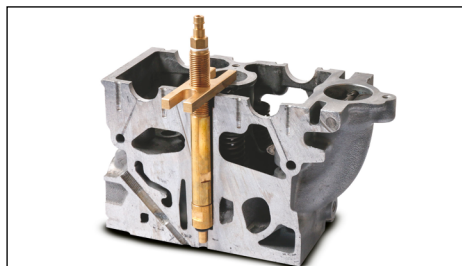

LTBG 04

With our innovative products, HV components and other parts can be tested non-destructively and without leaving residues. The LTBG 04 enables the introduction of forming gas into the component to be tested, while the ELS 04 ensures reliable leakage location. Whether mobile or stationary - our product is suitable for both areas of application.

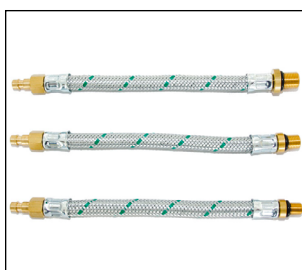

ELS 04

Practical adapter sets for compression pressure testing and engine pressure loss testing

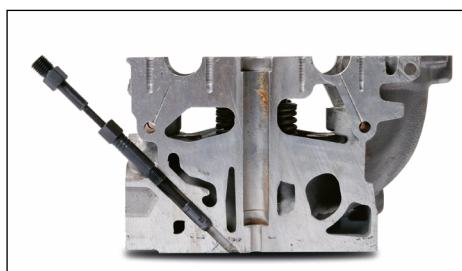

ZKD 100_HD:

Suitable for injection nozzle drilling Ø 17 and 21 mm for cars, trucks and agricultural vehicles.

KPA Flex-Set 01:

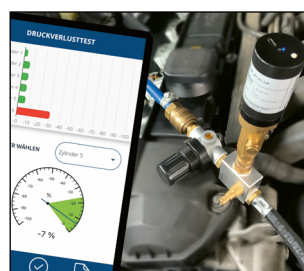

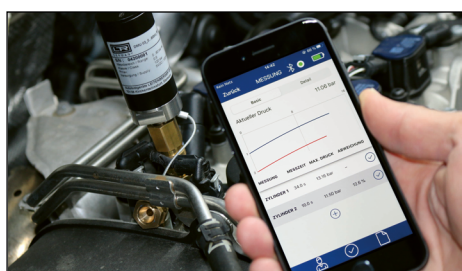

Suitable for all vehicles with petrol engine for adaptation via the spark plug thread (M 10x1, M 12x1,25, M 14x1,25).

ZKD 101:

Universal adapter set for almost all glow plugs. Time-saving, cost-effective and compatible.

The sets fit perfectly to all Leitenberger compression and engine pressure loss testers. Also for our innovative compression and engine pressure loss testers for petrol and diesel engines incl. data transmission via Bluetooth®.

KP_BT01_LR

DRV 05_BT

Do you already know our set for self-checking brake fluid testers?

EBT-Checker

The test set for the Leitenberger brake fluid testers EBT 03, EBT 03_USB and EBT 06 is an indispensable tool for every workshop. With this set you can perform a quick and reliable self-test of your brake fluid testers anytime and anywhere.

An exciting topic: Regeneration of the diesel particle filter in commercial vehicles, agricultural and construction machinery

In this expert article, our diagnostics expert Manuel Hug explains how the Leitenberger diagnostic packages from Jaltest can support you in this and thus avoid forced regeneration, for example.
